Essential oils are natural aromatic compounds found in the seeds, bark, stems, roots, flowers and other parts of plants. They offer beautiful and powerful fragrances that are sometimes referred to as "aromatherapy." But essential oils are so much more than that. They have been used throughout history in many cultures for their medicinal and therapeutic benefits. Modern scientific study and trends towards more holistic approaches to wellness are driving a revival and new discovery of essential oil health applications.

dōTERRA Certified Pure Therapeutic Grade (CPTG™) essential oils represent the safest, purest and most beneficial essential oils available today. They are gently and skillfully distilled from plants that have been patiently harvested at the perfect moment by experienced growers from around the world for ideal extract composition and efficacy. Experienced essential oil users will immediately recognize dōTERRA's superior quality standard for naturally safe, purely effective therapeutic-grade essential oils.
